Of light and dark—Monday, 45c

Men's Hose

Fast black—full seam—Monday, 6c

MACHINE-MADE PIE IS THE NEWEST

Philadelphia Invents an Apparatus Which Turns Out "Succulent Dainty" at the Rate of One Every Four Seconds.

REUTERS' SPECIAL. Philadelphia, July 8.—Lovers of the great American dainty, pie, will rejoice to learn that a new era has set in for its unlimited production. It is a far cry from the "pies mother used to make" to a superior product made by machinery, but this has been accomplished by a machine invented by a Philadelphia. For years there has been progress in almost every line of baking, with the exception of the succulent pie. Bakers and practical inventors along these lines, who experimented, have declared that machine-made pies were as impossible as perpetual motion. There are so many steps in the operation that it would seem their contention was well founded. Unhappily by precedent, however, the Philadelphia inventor has continued his experiment for two years, and at last has reached his goal. The pie-making machine has been installed in a baking company's plant in this city, and is now grinding out a steady stream of pies of all kinds and varieties. The machine an operator can now produce thousands of pies where he formerly turned out hundreds. Not only will this serve to cheapen production, benefiting the consumer by making it possible to use better materials, but, as most of the

work is mechanical, absolute cleanliness and uniformity are assured. The pie machine is long and narrow, being about 30 feet by 20 inches. One man and three boys constitute the operating force, turning out sixteen to eighteen finished pies a minute. A gas jet keeps the automatic disk warm. Situated over the machine is a tank which holds a sufficient amount of filling for 500 pies. An agitator keeps the filling from sticking to the sides of the tank. A piece of dough is placed on the plate and the next movement brings it under a die which forms the lower crust. Then the fruit is deposited from the tank and the plate moves forward. By this time another lump of dough has been placed on the plate, and the pie is now an initial, such as "L" for lemon, while an automatic bellows blows a puff of flour over the filling and keeps the fruit from packing at the outlet. After the "pie" for crusts has been properly mixed it is weighed and cut into proper sized pieces by a dough divider. A tray full of lumps of dough for bottom crusts is placed at one end of the machine and another tray containing lumps for top crusts at the other end. At the rear is a stack of plates, automatically fed by a ratchet. A magnetized arm swings around, picks up a plate and places it on a die made to receive it. A piece of dough is placed on the plate and the next movement brings it under a die which forms the lower crust. Then the fruit is deposited from the tank and the plate moves forward. By this time another lump of dough has been placed on the plate, and the pie is now an initial, such as "L" for lemon, while an automatic bellows blows a puff of flour over the filling and keeps the fruit from packing at the outlet. The next movement brings the filled pie and the upper crust together, one operation being completed by a die which covers the pie. Then the covered pie comes under the edging die, which cuts off all scraps, and the pie passes forward on an apron, which leads to the oven. One motion succeeds another, with such regularity that the finished pie is passing to the oven almost before one can grasp the idea and purpose of the machine. With no fuss and little noise the empty plate starts at one end and passes off the other end of the machine, a finished pie in less than four seconds.

GIRL TELLS PLANS FOR ARCTIC TRIP

Miss Marie Babbs, Young School Teacher, to Accompany Commander Peary on His Perilous Dash to North.

REUTERS' SPECIAL. New York, July 8.—On board the new Arctic ship Roosevelt, on which Commander Robert Peary will start soon on his ninth expedition in search of the North Pole, is a slender young girl, a Maine school teacher, who declares that she will share the peril and glory of the hazardous trip. She is Miss Marie Babbs of Westbrook, Me., 19 years old, and she gave up her position teaching to be companion to Mrs. Peary on the trip. Mrs. Peary had no objection to the girl's selection, and she has fully made up her mind to do it. I want to be there with them when they find the Pole, and I believe that Commander Peary is going to succeed this time. "I came on this trip in the spirit of adventure and I want to have everything there is in it," said Miss Babbs on board the Roosevelt. "Mrs. Peary says I ought to be content to go as far as the ship goes, and to remain with her and her family, who are going with us. But the Commander says I can go inland when he and his party leave the ship, and I have fully made up my mind to do it. I want to be there with them when they find the Pole, and I believe that Commander Peary is going to succeed this time. "Buster" is young Robert Peary, who

met against Miss Babbs while she talked. He is a sturdy, dark-haired little fellow, and is known to the public as the first man to reach the North Pole. He is the son of a farmer, and he has been a school teacher, a surveyor, and a soldier. He is now a lieutenant in the United States Army, and he is going to lead the expedition to the North Pole. He is a very brave and determined man, and he is going to succeed this time. "I want to be there with them when they find the Pole, and I believe that Commander Peary is going to succeed this time. "Buster" is young Robert Peary, who

FAINTS AT SIGHT OF BROTHER BELIEVED DEAD.

Kentuckian Who Started for California Gold Fields Makes Fortune in Australia.

REUTERS' SPECIAL. Dayton, Ky., July 8.—Missing for half a century, Frank Switzer, a bent and timorous man, has returned to his old home like an apparition from the grave and clasped his sister, Mrs. Youngblood, mother of County Attorney Charles W. Youngblood, in his arms as she wept at the shock of meeting the brother, to whom she had had good-by as a smiling, red-checked boy, and whom she had believed dead for forty-five years. When the gold fever in California was on the wane, Frank Switzer struck for the shores of the Pacific. He wrote home once from there, and his name was mentioned in the local papers. He was sent to the penitentiary for a short time, and he was given up for dead. "I will also carry an American flag of silk, about 200 feet, which has been given me by the Peary Arctic Club. Our flag shall reach the Pole first if it is in my power. "I wish it understood that I make the fight for the Pole under the auspices of the Peary Arctic Club, and to whom, and especially to Morris K. Jesup, its president, I owe this splendid ship and their invaluable assistance, both financially and personally. "Odd Australian Will. The will of an Australian detective provided an unusual way for dividing his

GIRL KILLS CINNAMON BEAR.

Stockman in Same Neighborhood Ropes Bruin by Leg.

REUTERS' SPECIAL. Laramie, Wyo., July 8.—Mayor N. F. Spicer, who has just returned from North Park, Colo., gives the details of two extraordinary performances at that place. Miss Maude Riggins, a 15-year-old girl and the daughter of a prominent stockman, shot and killed a large cinnamon bear with a 22-caliber rifle. The feat necessitated remarkable nerve. The girl discovered the huge bear, which weighed several hundred pounds, in the act of throwing a calf in her father's corral. She was so near that her position was very dangerous, but without hesitation she took deliberate aim at the bear, which was just in the act of turning around to attack her. She fired one shot, which struck the monster in the ear, penetrated the brain and caused instant death. The girl calmly called for assistance and aided in skinning the animal. Charles Murphy, a stockman, performed the other unusual feat by roping a huge black bear which he discovered among his cattle. The animal, with the rope around one of its hind legs, ran through a barbed-wire fence, where it became entangled, but before it could be captured or killed, Mr. Murphy having no gun, it clawed the rope in two and escaped.

Dead Sleeper Killed.

Philadelphia, July 8.—To escape the heat of her bedroom Mrs. Lizzie Englehart of No. 319 South Fifth street crawled out on a second-story roof to take a nap, and it cost her her life. The woman's body was found in the yard in the rear of the house at No. 319 South Fifth street.
